HOW TO USE THIS BOOK

Welcome to the Lost City

Somewhere under the jungle canopy, a city nobody remembers building is slowly waking up. Every maze in this book is a real place in it — a gate, a courtyard, a stairway that spirals further than it should.

Start at the little triangle. Find your way to the other one.

Trace with a pencil so you can erase and try again — every maze has exactly one true path, and no dead end is a wrong turn, just a place the city wanted you to notice.

Solutions for every maze are in the back, in case the jungle wins.
